

What data can tell us about sex and relationships

Crowdsourcing and Human Computation

Instructor: Chris Callison-Burch

Website: crowdsourcing-class.org

Stanford Speed Dating Experiment

- Linguists at Stanford University got permission to record speed dates, and collect pre-date and post-date surveys
- Participants wore audio recorders on shoulder sashes
- Recorded 2 sides of the conversations for 1100 4-minute dates

Pre-date survey

- Participants self-reported age, height and weight, hobbies and interests, dating background

(17) How interested are you in the following activities? (1=very uninterested, 10=very interested)

Playing sports/ athletics	1	2	3	4	5	6	7	8
Watching sports	1	2	3	4	5	6	7	8
Body building/exercising	1	2	3	4	5	6	7	8
Dining out	1	2	3	4	5	6	7	8
Museums/galleries	1	2	3	4	5	6	7	8
Art	1	2	3	4	5	6	7	8
Hiking/camping	1	2	3	4	5	6	7	8
Video Gaming	1	2	3	4	5	6	7	8
Dancing/clubbing	1	2	3	4	5	6	7	8
Reading	1	2	3	4	5	6	7	8
Watching TV	1	2	3	4	5	6	7	8
Theater	1	2	3	4	5	6	7	8
Movies	1	2	3	4	5	6	7	8
Going to concerts	1	2	3	4	5	6	7	8

Post-date survey

- Date perceptions and follow-up interest
- Conversational style and intention of their partners

(4) How often did **you behave** in the following ways on this "date"? (1=never, 10=constantl

You were <i>friendly</i>	never	1	2	3	4	5	6	7	8
You were <i>flirtatious</i>	never	1	2	3	4	5	6	7	8
You were <i>awkward</i>	never	1	2	3	4	5	6	7	8
You were <i>assertive</i>	never	1	2	3	4	5	6	7	8

(5) How often did the **other person** behave in the following ways on this "date"? (1=neve

They were <i>friendly</i>	never	1	2	3	4	5	6	7	8
They were <i>flirtatious</i>	never	1	2	3	4	5	6	7	8
They were <i>awkward</i>	never	1	2	3	4	5	6	7	8
They were <i>assertive</i>	never	1	2	3	4	5	6	7	8

Speed date data

- 4-minute sound recording files from each recorder
- Each date was then transcribed
- Transcripts marked words, laughter, filled pauses, speaker overlap, and restarts
- Timestamped the beginning and end of each conversational turn
- Dates averaged 812 words (406 per speaker), taking an average of 93 turns

F: Well what about you, what are you passionate about?

M: Um, I am passionate about probably two things.

F: Uh-huh.

M: Well, many things, but two that come to mind straightaway. One is travel.

F: Okay.

M: I like see different parts of the world-

F: Uh-huh.

M: -experience lots of different things. And I also- recently, I've got into exercise, and, um, just different things, so riding a bike, and swimming, and running.

F: Oh, okay. Uh-huh.

M: I did my first track run on the weekend.

F: Oh, you did? How was it?

M: It was hard.

F: [laughter] Yeah, I heard it's really hard.

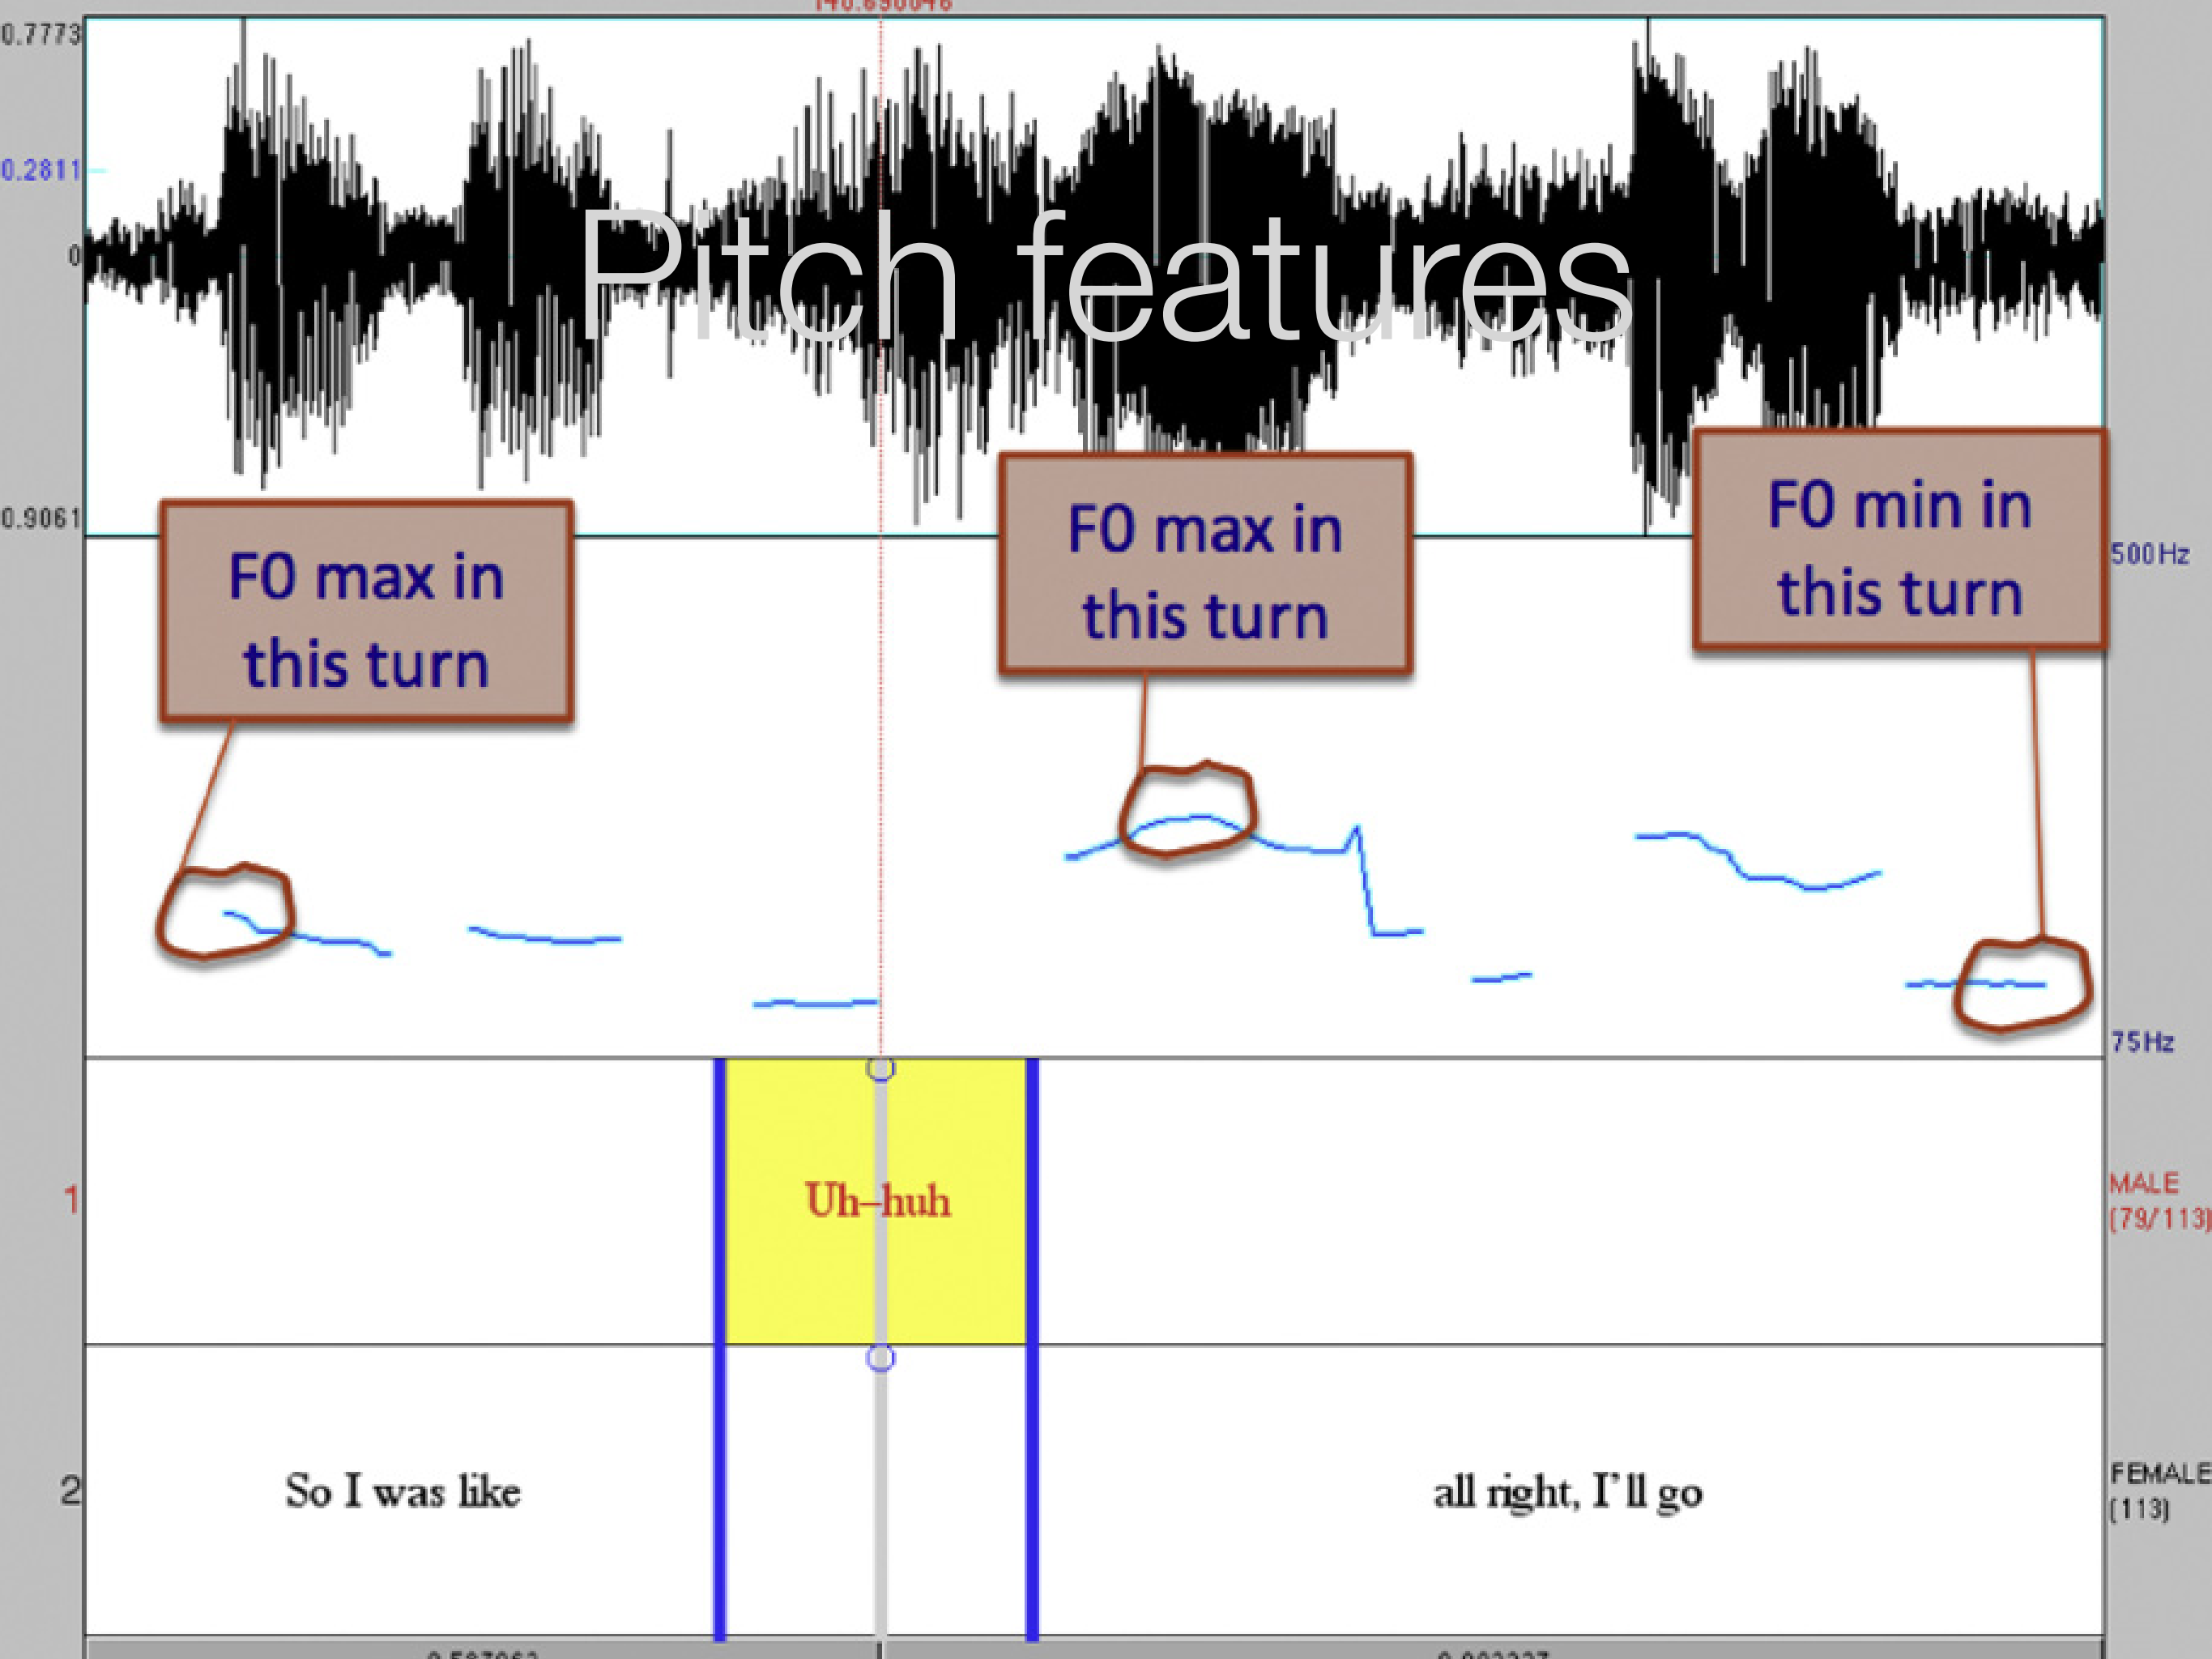

Prediction tasks

- Build a machine learning classifier to identify friendly, flirtatious, awkward, or assertive speakers
- Build separate classifiers for detecting when characteristics were self-reported or reported by partners
- Build separate classifiers for men and women
- $4 \text{ characteristics} * \text{self-v-partner} * 2 \text{ sexes} = 16 \text{ classifiers}$ (e.g., male self-reported flirtation classifier)

Feature extraction

- Features of the speech files: **pitch**, **intensity**, **turn duration** and **rate of speech** (num words per second)
- Lexical features: how often they mentioned **themselves** or the **other person**, word categories like **sex**, **love**, **hate**, **food**, **swearing**
- Number of **uh** and **ums**, **hedges**, **interruptions**, **laughters**, **agreements**, **questions**, expressions of **agreement**, **appreciation**, **sympathy**
- Rate of **accommodation** (adopting the other person's word usage)

Pitch features

Lexical Features

I	I'd, I'll, I'm, I've, me, mine, my, myself
YOU	you, you'd, you'll, your, you're, yours, you've
SEX	sex, sexy, sexual, stripper, lover, kissed, kissing
LOVE	love, loved, loving, passion, passions, passionate
HATE	hate, hates, hated
SWEAR	suck*, hell*, crap*, shit*, screw*, damn*, heck,
NEG EMO	bad, weird, crazy, problem*, tough, awkward,
NEGATE	don't, not, no, didn't, never, haven't, can't,
FOOD	food, eat*, cook*, dinner, restaurant, coffee,
DRINK	party, bar*, drink*, wine*, beer*, drunk, alcohol*,
ACADEMIC	work*, program, PhD, research, professor*,

Lexical Features

HEDGE	sort of, kind of, I guess, I think, a little, maybe, possibly, probably
META	speed date, flirt, event, dating, rating
LIKE	the discourse marker like (removing the verb like)
I MEAN	the discourse marker I mean
YOU KNOW	the discourse marker you know
UH	the filled pause uh
UM	the filled pause um

Discourse Features

TOTAL WORDS	total number of words in side
QUESTIONS	number of questions in side
CLARIFICATION	clarification question (Excuse me?)
INTERRUPTION	number turns one speaker interrupted the
LAUGH INITIAL	number of turn-initial or whole-turn laughter
LAUGH MEDIAL	number of turn-medial or turn-final laughter
RESTART	num disfluent restarts in conversation side
APPRECAITION	num appreciations (Wow, That's true, Great)
SYMPATHY	number of sympathetic negative assessments
AGREEMENT	num of agreements (That's true, For sure. . .

Classification

- Trained a Support Vector Machine for each of the 16 experiments
- For training data, took top 10% of data as positive training examples and bottom 10% of data as negative data
- For example, for *self-reported male flirtation*, sort all 1000 dates by self-reported male flirtation score take top 100 and bottom 100
- Since training data was small, did 4 fold cross validation, 30x times w/random order

Linguistic v. non-linguistic features

- How good are the linguistic features compared to non-linguistic features?
- Can we predict how well two people will hit it off just based on their appearance or on their shared interests, without observing their interactions?

Non-linguistic Features

ORDER	Order of the date (nth date the speaker has participated in tonight)
HEIGHT	The height of the speaker
BMI	The body mass index of the speaker
O-HEIGHT	The height of the interlocutor
O-BMI	The BMI of the interlocutor
AGE DIFF	The age difference between the pair
INTEREST SIM	The interest similarity between the pair

Classification Accuracy

What do you think?

- Do you think that the SVM's accuracy is better or worse than a person's accuracy at predicting whether someone is flirting with them?
- Do you think that 4 minutes of data is sufficient for making accurate predictions?
- Any methodological concerns?
- Could you use data to change your own dating strategies?

Data-driven Sociological Studies

- 3.2 million OKCupid users
- Profile information: age, gender, sexual orientation, location, ethnicity, religion, level of education, income level, height, body type, whether you like kids/pets/drinking/drugs, essays, profile pictures plus attractiveness ratings
- Database of 275,294 match questions
- 776 million answers to those questions

- What's more interesting to you right now? Love or Sex
- How willing are you to meet someone from OkCupid in person?
- Have you smoked a cigarette in the last 6 months?
- Could you date someone who does drugs?
- Would you strongly prefer to go out with someone of your own skin color / racial background?
- About how long do you want your next relationship to last?
- Would you consider sleeping with someone on the first date?
- Are you happy with your life?
- Rate your self-confidence
- How important is religion/God in your life?
- Would you prefer good things happened, or interesting things?
- Do you like horror movies?

Regardless of future plans, what's more interesting to you right now?

New

- ☐ Sex
- ☐ Love

Answer I'll accept...

- ☐ Sex
- ☐ Love

This question is...

- ☐ Irrelevant
 - ☐ A little important
 - ☒ Somewhat important
 - ☐ Very important
 - ☐ Mandatory
- ☐ Answer this question privately.

Explain your answer *(optional)*

The Best Questions on a First Date

- You would like to learn about your date, some important things that you would like to know are awkward to ask directly
- Find questions that correlate with what you want to know, but which people are more free about answering publicly

Are you looking for a partner to have children with?

☐ Yes

☐ No

☒ Answer this question privately.

Would you consider sleeping with someone on the first date?

- % answering yes -

Other questions to ask

predictive question	implied odds of first-date sex
Q: In a certain light, wouldn't nuclear war be exciting?	yes → 83%
Q: Assuming you were in the position to do so, would you launch nuclear weapons under any circumstances?	yes → 82%
Q: Could you imagine yourself killing someone?	yes → 82%

LTRs

- If you're interested in a long term relationship, you can use this methodology too
- When someone deletes their OkCupid account, the option of giving a reason
- One is 'I met somebody on OkCupid,' they can report their significant other's username
- 34,000 such pairs exist

top 3 user-rated match questions

our 3 recommended questions

Politics

- If you want to know: *Do my date and I have the same politics?*
- Ask: *Do you prefer the people in your life to be simple or complex?*

Politics

- People who prefer complexity are 65-70% likely to give the Liberal answer. Those who prefer simplicity in others are 65-70% likely to give the Conservative one:
- Should burning your country's flag be illegal?
- Should the death penalty be abolished?
- Should gay marriage be legal?
- Should Evolution and Creationism be taught side-by-side in schools?

Religion

- If you want to know: *Is my date religious?*
- Ask: *Do spelling and grammar mistakes annoy you?*
- If your date is okay with bad grammar and spelling then the odds of him or her being at least moderately religious is slightly better than 2:1

Religion & Writing Proficiency Level

Triangle opacity indicates seriousness of belief, as reported by the users.

Ethnicity

- What is it that makes a culture unique? How are whites, blacks, Asians, or whoever different from everybody else? What tastes, interests, and concepts define an ethnic group?
- Analyzed 500,000+ profiles with self reported race, looking at 280M words worth of profile essays
- Analyze words that are statistically distinct from other racial groups (everyone likes sushi, only Asians list sashimi).

Misconceptions about Gay People

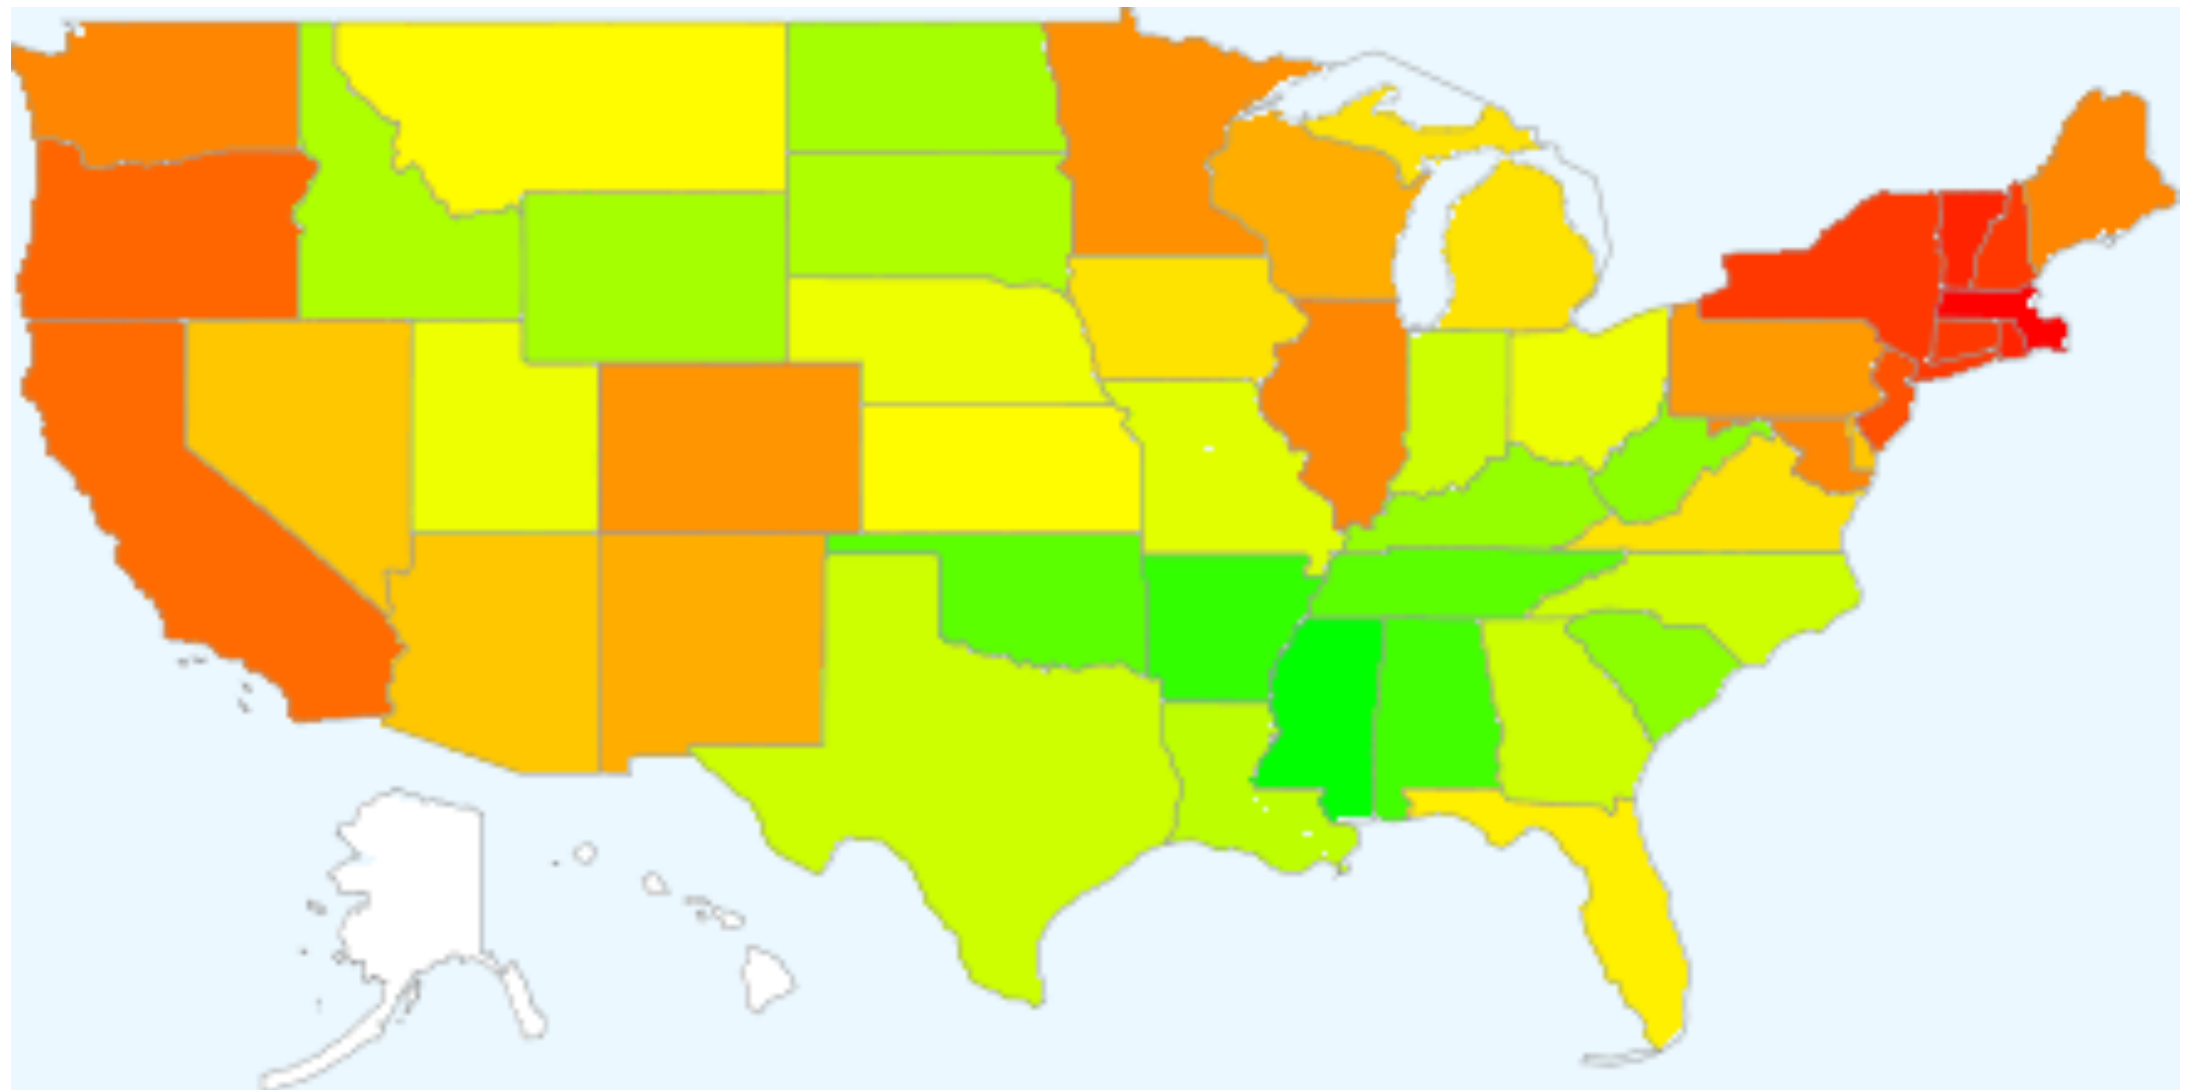

- Gay people more promiscuous than straight people
- Gay people want to convert straight people
- Gay people shouldn't be allowed to teach in our schools

“If a person is a practicing homosexual, they should not be teaching in our schools.”

Jim Demint, R-SC

Is homosexuality a sin?

Which is bigger: the earth or the sun?

% answering 'the earth'

people with X or fewer sex partners

Gay people looking at straight profiles

- Only 0.6% of gay men have ever searched for straight matches.
- Only 0.1% of lesbians have ever searched for straight matches.
- Only 0.13% of straight people's profile visitors are gay.

Straight people have gay sex

Have you ever had a sexual encounter with someone of the same sex?

Straight women have gay sex

men

women

Gay curiosity by region

How to increase your chances

- Data analysis can help determine what strategies work best for eliciting a reply
- A/B testing for pickup-lines?

Be Literate

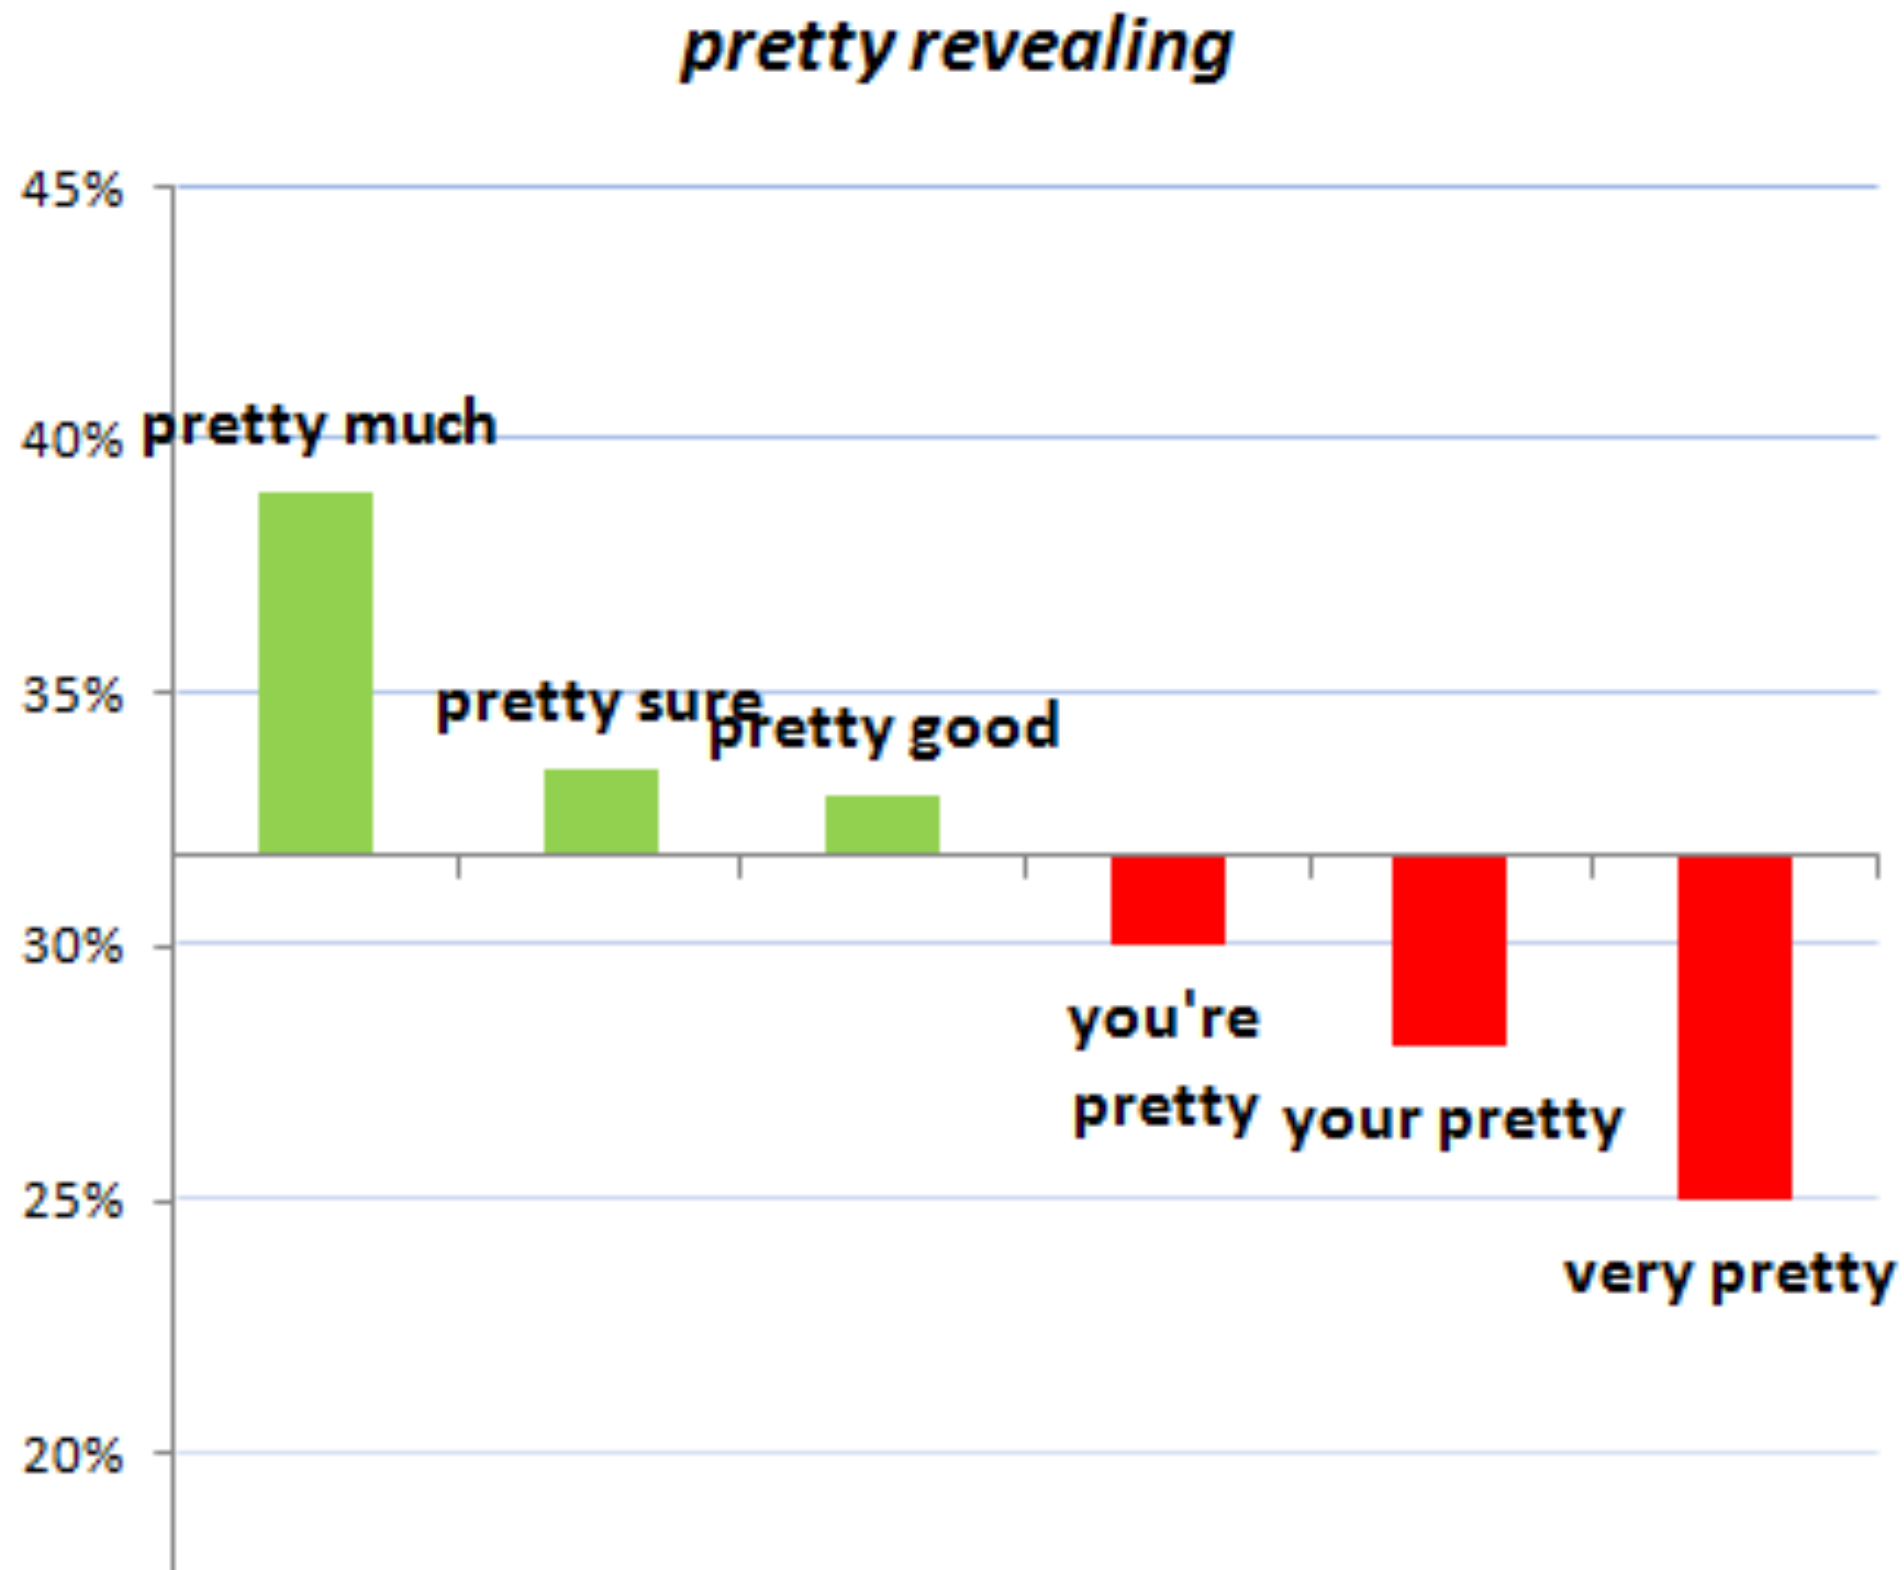

netspeak = fail

Avoid physical compliments

Avoid physical compliments

Use Unusual Greetings

Specifics are successful

Specific about them

50

Male self-effacement

Consider becoming an atheist

Implications

- Large numbers of people are willing to disclose information about their attitudes, and beliefs about religion, sex, politics
- Incentive: improving the algorithm for matching them up with compatible partners
- Side effect: coolest sociological data around

A decorative border on the left side of the slide, composed of a dense, vertical stream of small, multi-colored dots (red, green, blue, yellow, and purple) that tapers slightly towards the bottom.
